What is G-Speech?

The GlassOuse G-Speech is an advanced voice control module designed to empower individuals with limited mobility to operate devices hands-free. It converts spoken commands into keyboard or mouse actions, offering a seamless, accessible tech experience.

Who is G-Speech For?

- **Individuals with quadriplegia, ALS, muscular dystrophy, or cerebral palsy**
- **Users of augmentative and alternative communication (AAC) devices**
- **Anyone needing voice-based access to technology**
