

COSMO

Cosmo by Filisia is an award-winning, evidence-based system designed to transform education and therapy for individuals with additional learning needs. Combining innovative hardware with engaging software, Cosmo offers a versatile and inclusive approach to skill development and play.

♥ FEATURES

- **Interactive Learning:** Cosmo's activities are designed to enhance cognitive, communication, and physical skills, making learning both effective and enjoyable.
- **Multi-Sensory Engagement:** Uses lights, sounds, and vibrations to enhance engagement and learning through visual, auditory, and tactile feedback.
- **Supports Communication & Social Skills:** Helps develop turn-taking, collaboration, and teamwork through group activities and integrates with Augmentative and Alternative Communication (AAC) systems.
- **Enhances Motor Skills & Coordination:** Improves fine and gross motor skills through targeted exercises and movement-based learning.
- **Adaptive & Customizable Learning:** Activities can be tailored to individual needs, skill levels, and learning goals, with adjustable difficulty settings.

Experience the transformative power of Cosmo in your educational or therapeutic setting. Visit our website to learn more, explore our product range, and read testimonials from satisfied users.

Join the growing community of educators, therapists, and families who trust Cosmo to make learning and therapy engaging, inclusive, and fun.

PRODUCT OFFERINGS

COSMO SWITCH

A unique Bluetooth accessibility switch that enables users to access AAC systems, navigate devices, control media players, play video games, and more. It features a user-friendly setup, resilient design, and customizable touch sensitivity, color, and brightness to align with individual needs

COSMO EXPLORE

Designed for individuals with additional learning needs, Cosmo Explore provides a collection of activities aimed at training a wide range of skills while encouraging quality family time and inclusive play. It includes three smart, dynamic, and visually appealing buttons called "Cosmoids" and an iPad app featuring 18 highly motivating and intuitive activities designed by teachers and therapists.

COSMO EXCEL

Tailored for organizations, teachers, and therapists to support inclusive learning, therapy, and play, Cosmo Excel comprises six Cosmoids and access to 18+ interactive activities. This package is ideal for group settings, facilitating collaborative learning experiences

COSMO PRO BUNDLE

The Pro Bundle is designed for professionals seeking comprehensive resources and support. It includes six Cosmoids, access to 35+ activities (with new content added monthly), all activity guides, and unlimited staff training and support. This bundle ensures that educators and therapists have the tools and knowledge to maximize the learning and engagement potential of Cosmo

DIGITAL PLANS

- **All Activities Plan – 1 Year:** This digital plan offers access to 35 activities (with new content added monthly) and all activity guides. It's designed to maximize the learning and engagement potential of Cosmo, providing a wide range of interaction ideas and strategies.
- **Pro Plan – 1 Year:** The Pro Plan includes all the features of the All Activities Plan, plus unlimited staff training and support. This ensures that educators and therapists are well-prepared to deliver impactful sessions with confidence

Cosmo for Schools:

Designed in collaboration with over 200 educators and therapists, Cosmo enhances curriculum delivery in both mainstream and special education settings. It boosts student engagement, supports teachers in delivering the curriculum, and provides data insights to monitor progress.

Cosmo for Therapy:

Utilized by over 3,500 organizations worldwide, Cosmo supports therapists in delivering creative and engaging sessions. Its activities aid in developing fine and gross motor skills, spatial and body awareness, attention, and concentration. The dynamic force sensors in Cosmoids adjust responsiveness based on individual needs, making it suitable for people with limited physical mobility or those who have sustained brain injuries or strokes.
