tecla-e™: Empowering Independence Through Technology

The tecla-e™ is an innovative assistive device designed to enable individuals with upper body mobility impairments to seamlessly control smart devices and mainstream technology. By integrating with adaptive switches and wheelchair driving controls, tecla-e offers users the ability to navigate their digital world with ease and independence.

Key Features and Advantages:

- ***Multiple Device Control:*** *tecla-e can pair with up to eight Bluetooth-enabled devices, including iOS and Android smartphones, tablets, computers, and smart TVs. This allows users to switch between devices effortlessly, managing tasks such as sending emails, browsing the web, and controlling media playback.*
- ***Smart Home Integration:*** *Through Wi-Fi connectivity, tecla-e enables control over smart home devices like lighting systems, thermostats, and security cameras. Integration with platforms such as Amazon Alexa and IFTTT further enhances environmental control, promoting a more accessible living space.*
- ***Built-in Light Touch Button Switch:*** *The device features a sensitive button switch requiring minimal force to activate, providing an additional access method for users with varying needs.*
- ***Extended Battery Life:*** *Equipped with a rechargeable battery, tecla-e supports over 48 hours of continuous use, ensuring reliability throughout daily activities.*

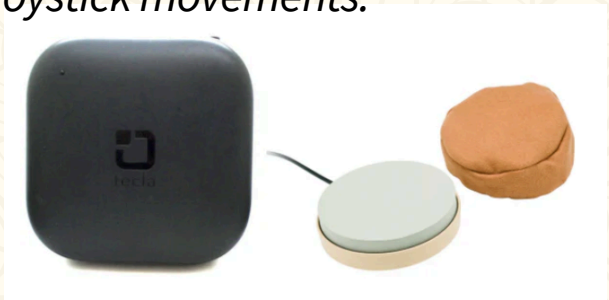
Tecla-e Kits: Tailored Solutions for Diverse Needs. To cater to specific user requirements, Tecla offers specialized kits that combine the tecla-e device with compatible accessories:

tecla-e Joystick Kit: *Designed for individuals who can operate a joystick, this kit facilitates seamless control of smart devices through joystick movements.*



tecla-e Pillow Switch Kit: *Ideal for users who can exert light pressure, this kit includes a sensitive pillow switch that enables device control with minimal effort.*

tecla-e Sip-and-Puff Switch Kit: *Suited for individuals with limited mobility, this kit allows control through sip-and-puff actions, offering an alternative input method.*

Buddy Button

tecla-e Switch Kit: *This kit is ideal for anyone who can access a light-touch switch, providing an effective solution for controlling smartphones or tablets with a button switch.*

tecla-e Wheelchair Kit: *Specifically designed for wheelchair users, this kit integrates the tecla-e with wheelchair controls, enabling users to operate their devices directly from their wheelchair interface.*

Tecla App: Enhancing Control and Customization

The Tecla app, available for both iOS and Android devices, serves as a companion to the tecla-e, offering enhanced control and personalization:

- ***Customizable Remote Interface:*** *Users can create over 20 unique buttons within the app to perform specific functions such as calling contacts, sending messages, launching applications, or adjusting volume. This customization streamlines interactions with frequently used features and contacts.*
- ***Smart Home Device Integration:*** *The app facilitates seamless integration with smart home platforms like Logitech Harmony Hub, Amazon Alexa, and IFTTT. This enables users to control various home devices, including Wi-Fi lights and smart thermostats, directly through the app. tecla*
- ***Remote Monitoring and Location Sharing:*** *Family members and caregivers can monitor the user's tecla-e device remotely through the app, providing an added layer of safety and support. tecla*

By consolidating control of multiple devices and integrating smart home functionalities into a single interface, tecla-e enhances autonomy and quality of life for individuals with mobility challenges. Its customizable features and broad compatibility make it a versatile solution for personalized accessibility needs.
