

# Celtic Magic

**Empowering Accessibility Through Innovation**

## Background

Celtic Magic specializes in creating high-quality assistive technology solutions for individuals with disabilities. Our products are designed to improve accessibility, enhance independence, and provide seamless interaction with computers and gaming systems.

## Why Choose Celtic Magic?

- **Cutting-Edge Technology:** Our products leverage advanced engineering for effortless control.
- **User-Centric Design:** Each device is built with comfort and accessibility in mind.
- **Seamless Compatibility:** Works across multiple platforms and assistive systems.
- **Empowering Independence:** Helping users overcome challenges in daily digital interactions.

# Products

## G-Click: Gyroscopic Tilt Switch

- Uses solid-state gyroscope technology for zero-force operation
- Self-calibrating design adjusts to user positioning automatically
- Ideal for hands-free control with minimal effort

## I-Click: Infrared Muscle Twitch Switch

- Detects slight muscle movements using infrared technology
- Offers zero-force operation with real-time LED feedback
- Perfect for facial muscle control and adaptable to different applications

# Our Innovative Products

## Feather: Ultra-Light Force Joystick/Mouse

- Uses magnetic levitation for a feather-light touch (as low as 5g of force)
- Functions as both a joystick and mouse for PC, Mac, iPad (USB-C), and Android
- Ideal alternative to eye-gaze systems for computer control

## Dangle: Low-Profile, Light-Force Joystick

- Inverted design for low-profile use and light-force operation (10g force)
- Adjustable sensitivity for customized control
- Compatible with the Microsoft Adaptive Controller for gaming and computer navigation

## GCM100 System: Advanced Gaming and PC Control

- Customizable options for enhanced gaming and PC accessibility
- Designed for seamless integration with other assistive devices
- Ideal for users seeking a fully adaptable experience

## Microsoft Adaptive & Sony Access Controller Features

- Customizable Controls: Swappable button caps, adjustable sensitivity, and attachable accessories for personalized interaction.
- Seamless Connectivity: Adaptive hubs and input options for easy integration with assistive devices.
- Ergonomic Design: Designed for comfort, enabling long-term use with minimal strain.
- Expanded Accessibility: Compatible with external switches and assistive technologies for enhanced usability.
